EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brent Vecchia on 4/24/11.

Claim 36:

Replace **all** of Paragraph 2 (lines 4-7) with

listening on a network interface for a first client message and first data that is encrypted according to a security format for wireless data, wherein the listening includes listening on a first port having a number selected from the group consisting of the numbers 9208 through 9282, and listening on a second port of the network interface for a second client message and second data that is encrypted according to a security format for wired data wherein the second port has a number 443

Claims 36, 38, 39:

Replace "machine-readable medium" in line 1 of each of claims 36-39 with "machine-readable storage device"

Cancel Claim 37

Specification Paragraph [0038] replace last line "specification, which is available at <http://www.wapforum.org>" with "specification."

Allowable Subject Matter

Claims 18-26, 38-48 are allowed over the prior art of record for the reasons as set forth in the BPAI decision on 1/12/2011.

Examiner notes that Huber US 7,237,261 as cited in the IDS, states that port "920x" may be used. However based on context, WAP ports "920x" refer to the range 9200 to 9207 (Column 3 lines 20-30).

Examiner notes that Stewart US 6,571,221 as cited in the IDS, states that a mobile unit may send location and GPS information, and that ports 9278-9280 deal with GPS information (Column 5 lines 40-45). However it is unclear if Stewart employs those ports or those GPS systems.

Examiner cites <http://www.networksorcery.com/enp/protocol/ip/ports09000.htm> as a source for definition of Ports 9000 to 9999.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER J. BROWN whose telephone number is (571)272-3833. The examiner can normally be reached on 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edan Orgad can be reached on (571)272-7884. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
